DETAILED ACTION

Double Patenting

Claim 8, 9, 19, 20, 30, 31, 41, 42, 51, and 52 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 24 and 53 of U.S. Patent No. 7,128,744 in view of Baccelli (US Patent 6,306,136). The claims in the instant application are substantially the same as that of the parent claims having at least a bone plate with an upper and lower surface with both a threaded and unthreaded hole passing through and a head portion that flares and configures to the bone and has at least partially threaded screw holes. The instant patent '744 is more specific than the parents claims but is missing only at least a first screw and a second screw having a shaft and head with thread configured and dimensioned to mate with the threaded hole of the bone plate. Baccelli '136 has screws with a threaded shaft and head. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the plate of the instant application having at least a screws with a threaded shaft and head in view of Baccelli '136 to better secure the plate to the bone.

Response to Arguments

Applicant's arguments with respect to claims 2-10, 12-21, 23-32, 34-43, and 46-54 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
